

## Patient Movement CHECKLIST

Step #	Task	Criteria	Completed
1.	Immediate Actions	<ul style="list-style-type: none"> <li>Person Under Investigation (PUI) isolated</li> <li>Staff in appropriate Special Pathogens Level 1 PPE</li> </ul>	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.	Notification	<ul style="list-style-type: none"> <li>Site <i>Emergency Operations Plan</i> (EOP)/Hospital Incident Command System (HICS) activation</li> <li>Facility leadership notified</li> <li>Local health department/public safety/emergency management activation / coordination</li> </ul>	<input type="checkbox"/> Yes <input type="checkbox"/> No
3.	Gather equipment	<ul style="list-style-type: none"> <li>PPE (per <i>Special Pathogens Donning Checklist</i>)</li> <li>Movement team leader and members<sup>1</sup></li> <li>Wheelchair or stretcher</li> <li>Building Information Card (BIC)</li> <li>Spill Kit</li> <li>Blankets</li> </ul>	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.	Site Safety	<ul style="list-style-type: none"> <li>Staff don/doff location secured</li> <li>Egress route identified</li> <li>Facility stretcher / wheelchair designated for patient use</li> <li>Identify movement team (Staff in appropriate PPE)</li> </ul>	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.	Operations	<ul style="list-style-type: none"> <li>Movement team leader coordinates with EMS on PUI movement operation</li> <li>Movement team leader decides on hospital staff roles and positions</li> <li>EMS determines patient movement device(s)</li> </ul>	<input type="checkbox"/> Yes <input type="checkbox"/> No

<sup>1</sup> The Movement Team is the group of personnel responsible for moving the PUI from the hospital bed to the transport vehicle. The team typically consists of at least two EMS paramedics and two hospital clinicians; however, factors such as patient size, clinical acuity, and need for ongoing clinical interventions (e.g., manual ventilation) may require additional staffing. The Movement Team Leader will be the EMS officer/paramedic supervisor. The Movement Team Leader will confer with the clinical staff and develop a plan for the move, including (but not limited to) patient management needs and interventions required en route; movement device; adjunctive equipment needed (e.g., patient lift; slider board; linen); egress route/movement path; destination and arrival plan/coordination; and accompanying staff, equipment, and documentation. The Movement Team Leader will also be responsible for the directing the actual lifting, packaging, and moving activities to minimize contamination risk and avoid risks or injuries to the patient or staff.
