

Cough? Fever? Rash?

KEEP YOUR FAMILY SAFE FROM MEASLES

Measles is contagious and can be very serious.

This is what you can do to keep you and your family safe from measles:

- + Make sure you and your visitors are free of fever, rash, or respiratory symptoms.
- + Ask family and friends to wait to visit your home until they are healthy and don't have any of the above symptoms.
- + Make sure you, your guests, your other children and family caregivers wash hands before visiting
- + Make sure you and your visitors are vaccinated to prevent the measles. Two doses of measles vaccine are recommended for everyone 12 months and older.
