

COVID-19

Updated Hospital Visitor Policy

Each patient will be allowed visitors according to the patient's status, condition, and circumstances. All visitors will be screened for COVID-19 infection or exposure.

All visitors must show proof of being up-to-date on COVID-19 vaccination or have a negative COVID-19 test result issued in the last 48 hours.

We will check if visitors show COVID-19 symptoms, or may have been exposed to someone with COVID-19.

Exceptions to this policy may apply when:

- + visit is medically-necessary and essential to the patient's care
- + patient is in an end-of-life situation
- + patient is receiving labor and delivery services
- + patient is an infant in the neonatal ICU, or a minor
- + patient has a developmental or cognitive disability
- + patient needs other support

Visitors are required to wear masks at all times.

If you need a COVID-19 test or vaccine, our patient navigators can direct you to our testing or vaccination clinics today.

COVID-19

Updated Outpatient Clinic Visitor Policy

To protect our patients, visitors, and staff,
we have updated our visitor guidelines:

- + Patients will be allowed to bring visitors to their appointment.
- + A special aide or assistant is allowed to accompany patients if required.
- + Visitors who show COVID-19 symptoms, or who may have been exposed to someone with COVID-19, will not be permitted.

Visitors are required to wear masks at all times.
