COVID-19 VACCINE

Most individuals are now eligible to get a COVID-19 vaccine:

- + People aged 6 months to 4 years can get three pediatric doses (one-tenth strength) of Pfizer-BioNTech
- + People aged 5 to 11 can get two pediatric doses (one-third strength) of Pfizer-BioNTech
- + People 12 and older can get two doses of Pfizer-BioNTech
- + People 18 and older can get two doses of Moderna

Additional Primary Series Doses of Pfizer and Moderna

Additional primary series doses of an mRNA vaccine are preferred for people who have a weakened immune system due to a condition or treatment.

Additional primary series doses are not recommended for most people with other medical conditions such as diabetes, heart or lung disease.

COVID-19 Booster Dose - Pfizer and Moderna Vaccine Recipients

The updated COVID-19 vaccine boosters are recommended for everyone 5 and older who received their most recent vaccine dose at least two months ago.

The updated Pfizer booster is recommended for everyone 5 and older, and the updated Moderna booster for everyone 6 and older. You can choose which booster to get.
