

DIRECTIONS

**NYC Health + Hospitals/Jacobi
1400 Pelham Parkway South
Bronx, New York 10461**

Jacobi is located at 1400 Pelham Parkway South, in the Morris Park/Pelham Parkway neighborhood of the northeast section of the Bronx. All services are provided on the Jacobi hospital campus in **Building 1, Building 6, and Building 8**

BY CAR

Bronx River Parkway or Hutchinson River Parkway or
New England Thruway (I-95) to Pelham Parkway.

Exit on Williamsbridge Road.

(Right turn from Bx River Pkwy, Left from I-95 & Hutch).

Take the Service Road to the Jacobi entrance.

BY SUBWAY

Take the IRT #2 or #5 train to Pelham Parkway and then take the Bx12 bus (Eastbound) to Jacobi's main entrance or the Bx12-SBS to Pelham Parkway and Eastchester Road.

BY EXPRESS BUS

New York Bus Service operates an express bus (BxM10) to Pelham Parkway from several points on the East side of Manhattan. The cost is \$6.75 each way; slightly less with a special Travel Card from the MTA.

For schedule and route information, call (718) 994-5500

PSYCHOLOGY EXTERNSHIP PROGRAM

PSYCHOLOGY EXTERNSHIP PROGRAM

The Psychology Externship Program at NYC Health + Hospitals Jacobi (formerly Jacobi Medical Center) is offered by the Department of Psychology within the Department of Psychiatry. Jacobi is a municipal hospital included within the North Bronx Healthcare Network (NBHN). Jacobi is located in the East Bronx, which serves a large population of African American, Eastern European, Caribbean, Italian, Latin American, Russian, South Asian, and many other ethnic communities. Mental health and other services are routinely provided in Spanish and English, with translators available for patients speaking over 200 other languages.

The purpose of the Psychology Externship Program is to provide qualified psychology graduate students with a rich variety of supervised clinical experiences in an urban community hospital setting. Externs are selected from applicants who are currently enrolled in doctoral programs in psychology. To qualify for application, students must be at least in their second year of a clinical, school, counseling, or health psychology doctoral program. In addition, students who are concurrently applying for internship will not be considered for an interview. It is understood that the graduate school will provide a fieldwork supervisor who is responsible for ongoing communication and liaison with Jacobi, as well as the extern's insurance coverage. The externship will meet the school's academic requirements for course or fieldwork credit.

Externship students participate in selected clinical functions under the supervision of psychologists and professional staff from other disciplines. The externship program also provides opportunities for students to participate in a variety of didactic and other clinical experiences, including inpatient milieu treatment, weekly team meetings, weekly didactic seminars, and weekly ground rounds. Private institutions may incur a nominal administrative fee.

The Jacobi Psychology Externship is a nine-month clinical training program that will begin on Friday September 20, 2024 and will end on Friday, June 13, 2025. Students are required to attend Externship for 20 hours (3 days) per week.

The philosophy of the Externship is that psychologists should have clinical training that encompasses experience with a broad range of psychological functioning. As such, all students are required to complete at least one rotation on an Adult Inpatient Psychiatry unit. Students will divide the year into two 4.5-month-long rotations. Students will spend 4.5 months on an Adult Inpatient Psychiatry unit and 4.5 months on an elective service from the list below:

1. Family Advocacy Program
2. Comprehensive Addiction Treatment Center
3. Adult & Pediatric HIV Comprehensive Services
4. Pediatric Neurodevelopmental Services
5. Bariatric Surgery

Students who elect a rotation on the Adult & Pediatric HIV Comprehensive Services, Psycho-Oncology, Bariatric Surgery or the Pediatric Neurodevelopmental Services will be required to combine their elected rotation with time on another elective rotation in order to fulfill the 20 weekly externship hours.

Final rotation placements will be determined by the Externship Directors based on the student's preference and available days, the number of open positions at each service, and service-specific requirements.

Training opportunities may also be available in the form of a brief clerkship on the Consultation Liaison service as well as the Comprehensive Psychiatric Emergency Program upon request.

Schedule

Days at the externship program are individualized for each student and are based on the student's available time and their rotation placement. All externs are required to attend didactics, which occur on Fridays 12:00-2:00 pm.

While attending the inpatient rotation, externs are expected to be present on the unit during the morning hours, 3 days a week, one day of which must be Tuesdays.

Students will be asked to provide a letter from their DCT verifying that the school permits the student to attend externship for 20 hours, 3 days a week.

Request for Leave/Approved Absence Policy

Externs must fulfill a minimum of 650 hours on-site over the course of the Externship Training Program. The program runs for approximately 40 weeks, from Friday, September 20, 2024 and will end on Friday June 13, 2025. Externs can take a maximum of 12 days off in addition to all observed National Holidays.

(Columbus Day; Veteran's Day; Thanksgiving Day; Christmas Day; New Year's Day; Martin Luther King Day; Presidents' Day; Memorial Day) up to 6 vacation/personal days, and up to 6 sick days.

Each extern will be provided with a form to track time off over the course of the program. Time off will be monitored the Directors of the Externship Training Program.

Direct supervisors must be informed of planned time off in advance via email and must indicate their acknowledgement with a signature on the form. For unplanned time off, your direct Supervisor should be informed as soon as possible via email and sign form upon your return.

Directors must be included in all email correspondences related to your absences.

Timeliness: You must arrive to work within 5 minutes of the official starting time. Your weekly schedule will be arranged with your individual supervisors.

Timesheets: You must sign your timesheet accurately. Your timesheet must be completed and signed by you by Friday at 2 pm.

Psychological Testing

Externs may be assigned a number of focal assessments that include one or two testing instruments, for the purpose of clarifying diagnoses and gaining insight into patient's dynamics as it relates to treatment objectives. Each service has its own patient population and externs will utilize assessment techniques and instruments that are commonly used at the particular service.

Interested externs may be given an opportunity to administer at least one comprehensive psychological testing battery during the year. In addition to the formal written report, externs may be expected to present their findings orally to the referring multidisciplinary team and to develop a sensitive approach for sharing feedback with the patient.

Didactic Seminars

All Psychology Externs attend a weekly one hour seminar each Friday, which covers a broad range of topics including: risk assessment; treatment of psychosis; family and group therapy on inpatient units; psychological testing; relational therapy; Acceptance and Commitment Therapy (ACT); issues in addiction; psychological aspects of HIV/AIDS; LGBT issues and cultural sensitivity among others. Students will also have the opportunity to present their cases to a consultant as well as process their externship experience.

APPLICATION PROCEDURES

Dates based on PSYDNYS-NYNJADOT Externship Guidelines for 2024-2025

All applications must be uploaded directly to the APA Externship portal: nynjadot.apa.org

For specific questions, please reach out to the Director of the Psychology Externship Program at:
Mariela Reyes, Ph.D. (718) 918-6782 reyesm21@nychhc.org
Tiffany Rodriguez, Psy. D (718) 918-6740 rodrigut5@nychhc.org

Please submit all of the following with your application:

- Eligibility letter signed by your DCT verifying that the school permits you to attend externship for at least 20 hours (two and one half days) per week.
- An Autobiographical statement: Tell us about yourself in 500 words or less;
- Your CV (Please insert your DCT's name, email address, and phone number);
- A cover letter describing your clinical experience and interests (1 page);
- Two letters of recommendation via the portal (or emailed to reyesm21@nychhc.org, at the recommender's discretion);

Review and Acceptance Process:

- Applications may be submitted NO EARLIER THAN Monday, January 8, 2024 at 9:00am, and NO LATER THAN Monday, January 15th at midnight.
- Interviews will be scheduled thereafter and virtual interviews will be held from February 7th, 2024 to February 29th, 2024.
- Offers will only be made via email and respective DCTs will be copied on the email offers.
- Initial offers will be made between 9:00 am and 4:00 pm on Monday, March 4th, 2024.
- After receiving an offer on Monday March 4th, students have 2 hours to accept or decline the offer.
- Students who receive an offer AFTER 4pm on Monday, March 4th have until 9:00 am on Tuesday to accept or decline the offer.
- Students who have applied for Internship at Jacobi are not permitted to apply for Externship for the same year.
- Former Externs are encouraged to apply for Internship in future academic years and are extended an interview for Internship.

Psychiatry

The four acute inpatient units at Jacobi are locked, short term units providing treatment for acute psychiatric disorders. The average length of stay on the inpatient units is two weeks which means that much of the focus of training will be on assessment and short-term therapeutic interventions. One of the units is a bicultural unit. Patients are typically involuntarily committed to the hospital. The units are structured to provide a milieu treatment setting in which both staff and patients participate in the recovery process. The extern functions in the role of psychologist on a team which includes psychology, social work, psychiatry, creative arts therapy, and nursing. The major goals of the inpatient service are to provide rapid and thorough assessment, treatment of the presenting mental illness, and discharge planning.

Patients hospitalized on inpatient units are primarily from economically disadvantaged, ethnically diverse backgrounds. Diagnostically, a broad spectrum of presenting problems are seen on the unit, including psychotic disorders, major affective disorders, substance-abuse disorders, and a range of character pathologies. On admission, an attempt is made to gather comprehensive information about the individuals, their past and their current environment. The goal is to understand which factors in a person's life may have converged to contribute to the need for the current psychiatric hospitalization.

Treatment on the units stresses the use of the milieu. Patients are seen individually, with their families and in groups. Psychotropic medication is provided by an attending psychiatrist. Regular therapeutic community meetings are held and are facilitated by a staff member or intern with the active participation of the extern.

Externs each carry a maximum of three patients at a time. The extern is responsible for the coordination of care involved in managing the case, presenting at team meetings, helping to create discharge plans and maintaining necessary documentation. The extern is also expected to co-lead therapy groups on the unit. The Supervising Psychologist on the unit provides weekly supervision on the extern's primary therapy cases and is available for on-the-spot consultation.

The Family Advocacy Program

The Family Advocacy Program (FAP) is a nationally recognized Child Advocacy Center (CAC) committed to the identification, assessment and treatment of children and adolescents who have been sexually assaulted, physically abused and/or neglected and their non-offending caretakers. FAP consists of a diverse and culturally sensitive multidisciplinary team including a specialized pediatrician, a psychologist, a forensic social worker, and Community Health Worker (CHW) in addition to psychology, dance movement and medical students. Collectively, this team offers a vast knowledge of and extensive experience in working with children/families found/suspected of being victims of abuse or neglect. The services provided at FAP include, but are not limited to, specialized medical evaluations; forensic sexual assault examinations; forensic interviewing; individual, family and group therapy; parenting classes; and assistance with crime victims services.

The mental health component of FAP offers many need-based services for child and family victims of trauma. On a short-term basis, services include crisis intervention, psychoeducation about trauma to parents and children, assistance with negotiating various social systems (e.g. ACS, school personnel) and/or law enforcement agencies as well as referrals to other services, as appropriate. For longer-term treatment, comprehensive diagnostic psychological assessments are provided for the children and adolescents in the program to inform individual, group and family psychotherapy. Our approach to treatment incorporates a family-based and relational treatment model, where trauma-informed cognitive-behavioral treatment strategies are also used. The FAP group program includes a parenting class and support group, an adolescent trauma group ((DBT Informed/skills based and process), Dance Movement Therapy and a parallel group for latency age children and their non-offending caretakers. Common treatment goals across modalities include personal safety, affect tolerance and regulation, self-esteem/resilience building, development of coping skills for managing anger and stress, communication and healing within the family system, and an increased sense of self-efficacy and empowerment. All trainees participate in one hour of individual supervision with the supervising psychologist and 30 minute individual supervision/mentorship with a psychology intern.

OUTPATIENT ROTATIONS, CONT'D

Psychologists-in-training are a valued part of our FAP multidisciplinary team. As part of the 20-hour weekly commitment to externship (roughly 2 ½ days), externs are expected to participate in group supervision and team meetings each Tuesday from 1-3 pm. Externs must be available on Tuesdays. FAP is not available to externs on Wednesdays. In order to accommodate our families after-school schedules, externs should expect to stay late at least one evening, possibly until 7pm.

PEDIATRIC SERVICES

Pediatric Neurodevelopmental Services

This Service provides neuropsychological and developmental assessments to children from birth through age 18. The focus of this rotation is the acquisition of knowledge regarding infant and child development and behavior. Externs on this Service will have the opportunity to interact and assess infants and children with a wide variety of developmental, learning and emotional problems. There is particular emphasis on prematurity, autism and behavior management. Several different assessment tools will be used, including infant assessments.

ADULT & PEDIATRIC HIV COMPREHENSIVE SERVICES

The Advanced Externship at the Adult/Pediatric Comprehensive Services (ACS/PCS) Clinics is a 6-month, 15 hours/week, outpatient mental health service rotation which intends to provide psychology externs with exposure to providing clinical and consultation services as a psychologist in a primary care setting to a population directly or indirectly affected by HIV/AIDS. Within a primary care and mental health integration (PCMHI) model, externs have the opportunity to learn how to introduce mental health services to patients naïve to treatment, effectively assess and determine the appropriate level of care needed for patients presenting with co-occurring mental health and medical conditions, and take appropriate referrals to other levels of care as appropriate. The multidisciplinary team in our clinic includes MDs, nurse practitioners, social workers, nurses, case managers and psychologists. There is also a part-time psychiatrist to provide psychopharmacological treatment. Externs also have the opportunity to learn models of short-term psychological or behavioral treatment planning and interventions through providing brief and structured interventions. We offer a range of mental health services including individual, group, and family therapy as well as assessments. Our unique outpatient setting facilitates the ability of mental health clinicians to coordinate interdisciplinary treatment with medical providers. The service uses a multimodal approach to mental health encouraging family and peer systems to be involved within our service for optimal community care. Externs have opportunities for individual psychotherapy, group therapy, and family therapy when available. They are provided with weekly supervision from a staff psychologist. Additionally, externs participate in our Mental Health Services team meeting, which takes place twice a month (Thursday availability highly encouraged but not required). Externs carry up to four individual cases for the duration of the training year. They may provide focal psychological assessments for patients when needed.

Psycho-Oncology

The new Psycho-Oncology service provides therapy to patients receiving care in the outpatient oncology service, and is a unique opportunity for externs to train in psychology within a medical unit. Patients on this service carry a wide range of diagnoses and are in various stages of illness and treatment.

Externs on this service will be offering a greatly needed and much appreciated resource, with the goal of helping patients to improve quality of life, maintain a sense of hope and purpose, and reduce distress and despair. Externs provide individual therapy, crisis counseling and possibly group therapy, become part of a multidisciplinary team, and help shape the role of psychology within a medical department.

Bariatric Surgery

The Bariatric Surgery Center at NYC Health + Hospitals/Jacobi is a designated Center of Excellence by the American Society of Metabolic and Bariatric Surgery (ASMBS). Our multidisciplinary team consists of surgeons, certified dietitians, nurses, a psychologist, and physician assistants. The role of the Psychologist-in-Training involves providing individual and group psychotherapy, conducting psychological evaluations, and functioning as a consultant to the medical team. The trainee will gain experience in understanding the interface between medicine and psychology, and will have the opportunity to work closely with other professionals on a multidisciplinary team. The trainee will also develop skills to use evaluations as brief interventions to focalized issues. Services are provided before and after weight loss surgery.

Patients initiated in the bariatric surgery protocol are referred from the general population, most of whom have not encountered behavioral health professionals in the past. As such, the Psychologist-in-Training is charged with the task of quickly establishing rapport and trust in the context of diagnostic assessment in order to provide appropriate disposition for patients. The adult population served (18+) is generally from the Bronx area, obese, predominantly female, and mainly identify as Black and/or Latina. Family and couples psychotherapy are also offered on a case by case basis. Supervision in Spanish can be offered to trainees interested in conducting psychotherapy in that language. Due to the prevalence of monolingual patients seen in this clinic, Spanish-speakers are strongly encouraged to apply.

****Please note that rotations are subject to change and placement is contingent upon service needs and supervisory availability.**

PSYCHOLOGY FACULTY

Mariela Reyes, Ph.D., Director of Externship Training; Psychiatry; Bariatric Surgery; Pride Health Clinic

Tiffany Rodriguez, Psy.D., Co-Director of Externship Training; 8A Supervising Psychologist Inpatient Psychiatry; Stand Up to Violence (SUV) Lead Mental Health Consultant
