NYC HEALTH+ HOSPITALS | Correctional Health Services

Any interpretation or analysis of these data regarding possible suspected overdoses must be conducted with caution. These data are compiled from documented patient events that involved naloxone administration, which is a standard, presumptive component of CHS emergency response protocols. They may also include patient encounters where a wide range of clinical presentations that can mimic overdose are referenced.

Narcan, Narcan + Suspected Overdose, and Suspected Overdose Events
Reporting period: 1/1/2024-10/31/2026
Date last updated: 11/19/2026
